

# MODERNIZE YOUR FALCON FLIGHT DECK

Our Pro Line 21™ upgrade can  
take your Falcon even further

# AN ALL-IN-ONE COLLINS SOLUTION

**Optimize your flight route to save fuel costs.**

**See more of your surroundings.**

**Engage with data easily on large display screens.**

**Identify weather threats in real time.**

You can expect all of these benefits and more when you choose to upgrade your Falcon's Pro Line 4™ avionics to the latest Pro Line 21™ technology. Pro Line 21 offers new capabilities designed to mitigate obsolescence and modernize your flight deck – taking your aircraft's performance to new heights.

## AN INVESTMENT IN THE FUTURE

You'll find Pro Line 21 flying on numerous platforms worldwide, earning a reputation for reliability, as well as enhanced safety and situational awareness. It's why Collins continues to invest in Pro Line 21's technology roadmap, and why we're committed to helping Falcon owners unlock its potential.

The Pro Line 21 upgrade comes with two years of Collins Avionics Service Package (CASP) coverage for an extra level of assurance that our qualified technicians are on-hand to help keep your aircraft flying.

Supported by OEMs, pilots and aircraft operators, Pro Line 21 is the logical, next-step solution that can take your Falcon – and you – where you want to go, now and well into the future.

## Featured Upgrades\*

- **Large LCD Displays**  
View crucial data across easy-to-read, large-14.1 LCD displays
- **Future Air Navigation System (FANS 1/A+)**  
The PL 21 upgrade is required for FANS 1/A+, offering cost savings, faster routing and enhanced communication options
- **MultiScan™ Weather Radar**  
Safely and efficiently navigate complex weather while improving situational awareness for a safer mission
- **Localizer Performance with Vertical Guidance (LPV)**  
Gain unprecedented access to more airports and more runways
- **Synthetic Vision System**  
Enhance situational awareness with our advanced, graphics-based vision systems
- **SXM Weather Service Upgrade**  
Receive improved, real-time weather alerts to aid pilot decision-making

\*Some upgrades are optional; optional features are subject to change at any time.
