FOR IMMEDIATE RELEASE

Air Dallas Instruments Partners with True Blue Power, Announces New Service and Sales Capabilities

Lewisville, Texas (November 3, 2026) — Air Dallas Instruments, a long-trusted name in the aviation industry, today announced a partnership with True Blue Power to expand access to specialized maintenance and product upgrades for advanced power solutions and lithium-ion aircraft batteries.

Centrally located in North Texas, Air Dallas Instruments is now an Authorized Service Center for True Blue Power lithium-ion aircraft batteries. The company is positioned to support aircraft owners and operators with efficient service and responsive turnaround times in support of the True Blue Power product line.

The partnership further expands Air Dallas Instruments' capabilities in cabin power system installation and support, including USB and wireless charging solutions, power outlets, and inverters. As demand for reliable in-flight power continues to grow, Air Dallas will help customers equip, maintain, and upgrade their aircraft to meet evolving passenger and crew power needs.

"By combining our repair and installation expertise with True Blue Power's advanced power technologies, we reinforce a commitment to dependable and responsive customer support," said Danny Barnfield, President and Owner of Air Dallas Instruments.

Key Benefits of True Blue Power Products

Substantial Weight Reduction
True Blue Power lithium-ion batteries save up to 85 pounds per unit over industry standard, adding payload flexibility and reducing airframe stress.

Unmatched Reliability
True Blue Power Gen5 lithium-ion batteries are on-condition/maintenance free and offer an 8-year lifespan.

Industry-leading Convenience Power
True Blue Power USB chargers deliver 45 to 100 watts of power to phones, tablets, laptops and other personal electronic devices.

Widely Available Integration
STCs for True Blue Power products, including lithium-ion aircraft batteries and emergency battery power supplies, are available for a large variety of airframes — with more on the way.

About Air Dallas Instruments

Air Dallas Instruments, established in 1977, is a family-owned aviation instrumentation service provider known for its high-quality testing, repairs, overhauls, exchanges, sales and Avionics Installs. Over the past four decades, Air Dallas Instruments has grown into one of aviation's most well-respected facilities, doing work for companies within the U.S. and internationally. Whether our customers are individuals, corporations or airlines, we treat everyone with equal respect. Our reputation speaks for itself. With a strong reputation for quick turnarounds and competitive pricing, the company supports Aircraft-On-Ground (AOG) situations to minimize client downtime. Under the leadership of President Danny Barnfield, Air Dallas Instruments continues to uphold the values of integrity, quality workmanship, and customer satisfaction.

About True Blue Power

True Blue Power specializes in the design and manufacturing of electrical power solutions for the global aerospace industry. This includes USB and wireless chargers, power conversion products, emergency battery power supplies, and advanced lithium-ion batteries. Select products feature proprietary lithium-ion battery technology, which offers stable chemistry, faster charging, consistent output, excellent cycle life and lower total cost of ownership. This translates into smaller, lighter products that are less than half the size and weight of existing battery solutions. True Blue Power supports business, commercial, defense, special mission, advanced air mobility and electric aircraft. For additional information, please visit truebluepower.com.
